

Turnkey Solutions

Area of Expertise

Turnkey solutions for large-scale Non-Revenue Water (NRW) Reduction programme in the current economic climate is a viable solution for Municipalities, utility companies and Government organisations. The greatest advantage of this type of appointment is allowing quicker procurement of the necessary service providers, contractors and suppliers as well as allowing the contracted service provider the flexibility of responding to various challenges that are inevitable in these types of interventions.

The JOAT Group of Companies has extensive experience in implementing turnkey NRW reduction programmes, all of which have been very successful in terms of achieving specified NRW reduction targets. All turnkey programmes implemented by the JOAT Group of Companies were also compliant of the respective Municipalities' Supply Chain Management rules and regulations.

Whether it is for small pressure management projects, large-scale mains replacement, or meter installation and replacement contracts, the JOAT Group of Companies has the necessary financial backing, resources, skills and capacity to deliver outcome-based solutions to Municipalities by the JOAT Group of Companies.
